Career Objective

QA Automation Engineer with 4.6 years of experience in Manual Testing, ETL Testing, Tosca Automation, and AI-powered workflow automation. Experienced in developing AI Agents for Dev and QA activities, integrating enterprise applications using MCP (Model Context Protocol), GitHub, Jira, and Confluence. Skilled in Prompt Engineering, AI-assisted test automation, REST APIs, and intelligent workflow automation.

Professional Summary

4.6 years of experience in Manual Testing, ETL Testing, and Tricentis Tosca Automation.

Hands-on experience in developing AI-powered Dev and QA Agents for automating enterprise software development and testing workflows.

Designed AI Agents to automate test case generation, regression suite creation, test execution planning, and test data generation.

Built AI-assisted workflows to automate software integration processes using intelligent agents.

Integrated AI Agents with Jira, Confluence, GitHub and MCP (Model Context Protocol) Server for enterprise workflow automation.

Worked on Prompt Engineering for optimizing AI Agent responses and improving testing productivity.

Good understanding of Microsoft Copilot ecosystem and Azure OpenAI capabilities for enterprise AI solutions.

Experience integrating AI Agents with REST APIs for enterprise applications.

Developed AI-powered Jira dashboards for defect analytics, execution reports, project insights and release tracking.

Automated generation of test data using AI Agents to improve testing efficiency and reduce manual effort.

Strong expertise in validating ETL processes using SQL queries for data quality and integrity.

Hands-on experience in Tosca Commander, Modules, TestCases, Execution Lists, Recovery Scenarios and Reusable Components.

Experienced in Functional, Regression, Sanity, ETL and User Acceptance Testing in Agile environments.

Proficient with Jira, Postman, GitHub, Visual Studio, Studio3T, Control-M, IICS and GitHub Copilot.

Certified in Tricentis Tosca Automation Specialist AS1 and AS2.

Technical Skills

Programming	SQL, Prompt Engineering
AI Technologies	AI Agents, Agentic AI, MCP (Model Context Protocol), Azure OpenAI (Basics), Microsoft Copilot
Automation	Tricentis Tosca, ETL Testing, Manual Testing
Enterprise Integration	REST APIs, GitHub Integration, Jira Integration, Confluence Integration
Tools	Jira, GitHub, GitHub Copilot, Postman, Visual Studio, Studio3T, Control-M, IICS
Databases	SQL, MongoDB
Methodologies	Agile, SDLC, STLC, Defect Lifecycle
Operating System	Windows

Professional Experience

Software Engineer

Mphasis Limited

Jan 2022 – Present

Project: Salesforce Marketing – Charles Schwab

Role: Automation Tester

Oct 2023 – Present

Project Description

Charles Schwab provides investment, wealth management, advisory, and banking services. The project focuses on customer data integration for targeted marketing campaigns based on customer attributes.

Responsibilities

Worked closely with business stakeholders to understand functional and technical requirements.

Designed and developed AI-powered Dev Agents and QA Agents to automate end-to-end software development and testing activities.

Developed AI Agents for automated generation of manual test cases, automation scenarios and regression suites.
Built intelligent AI workflows for automated test data generation based on business rules and application requirements.
Developed AI-powered Jira dashboards for automated reporting, sprint analytics, defect metrics and execution summaries.
Integrated AI Agents with GitHub repositories using MCP (Model Context Protocol) Server for intelligent code understanding and workflow automation.
Integrated AI Agents with Jira and Confluence to automate documentation, issue management and project tracking.
Developed automated enterprise workflows using AI Agents for requirement analysis, impact analysis, documentation, testing and reporting.
Assisted in building Agentic AI workflows using Prompt Engineering techniques.
Worked with REST APIs for integrating enterprise applications and AI services.
Explored Azure OpenAI capabilities for enterprise AI use cases and workflow automation.
Executed Functional, Regression, ETL and Sanity Testing using Tosca Automation.
Performed ETL validation by writing complex SQL queries to validate source-to-target data migration.
Developed reusable Tosca Modules and maintained enterprise automation suites.
Performed exception handling, synchronization, recovery scenarios and execution management in Tosca.
Collaborated with development, business and QA teams to deliver high-quality software releases.
Prepared automation reports, testing dashboards and project status reports for stakeholders.

Project: CRM Integration – Charles Schwab

Role: Manual Tester

Oct 2022 – Sep 2023

Project Description

CRM Integration project for Charles Schwab focused on stock-related services and customer management systems, involving manual testing, regression testing, and automation support.

Responsibilities

- Developed and executed manual test cases.
- Performed Functional, Regression, and Sanity testing.
- Managed client-requested testing activities independently.
- Conducted requirement analysis and prepared understanding documents.
- Logged and tracked defects using Jira.
- Participated in impact analysis and peer reviews.
- Coordinated with onshore teams for requirement clarification.

Education

Bachelor of Engineering (B.E.)

2016 – 2020

Narsimha Reddy Engineering College

Certifications

- Tricentis Tosca Automation Specialist Level 1 (AS1)
- Tricentis Tosca Automation Specialist Level 2 (AS2)

Personal Details

Name	Pravallika Yella
Father's Name	Aravind Kumar Yella
Languages	Telugu, English, Hindi
